The European Consumer Study is a multi-country survey run by Ipsos MediaCT, in partnership with the Interactive Software Federation of Europe (ISFE). It is designed to provide a better understanding of the societal context in which games are being played today in 16 European countries. The study used a combination of online self-completion survey and offline interviews and targeted respondents aged between 16 and 64.

For the purposes of this report, ‘Gamers’ are defined as anyone who has played a game on any of the devices and formats listed below in the past 12 months.

In Italy, 1,319 respondents completed an online survey over a two week period in October 2012.

The data was weighted to a profile of online gamers using data from an offline omnibus survey.

KEY HEADLINES

1. **Incidence of gaming amongst the online population is at 41%**
   - The largest gamer group is males aged 35-44, although the profile of gamers is fairly evenly distributed across age and gender.
   - Online is the most popular form of gaming amongst the online population in Italy.
   - 1 in 4 adults are playing games on a weekly basis. For non-gamers, a lack of interest in the category is the main barrier.

2. **23% of the online population are very or fairly interested in gaming**
   - Gaming is perceived as a ‘fun’ and ‘entertaining’ activity by the overall online population.
   - A higher percentage of gamers than non-gamers are interested in nearly all of the activities.
   - There is a strong interest in technology amongst gamers (75% vs. 48% non-gamers).
   - Gamers are also more likely to be interested in going out to bars and clubs (48% vs. 24% non-gamers) and taking part in sport (59% vs. 42% non-gamers).

3. **39% of parents play games with their children**
   - Health/fitness and educational benefits are acknowledged by a 12-14% of parents playing games with their children.
   - Many parents see gaming as having a positive impact on their child(ren). 60% believe gaming helps their child develop their skills more.
   - A third believe it encourages them to be more creative, while 6 in 10 say it encourages them to spend time alone.

4. **The majority of children aged 6-15 are buying or receiving games**
   - 1 in 4 parents of children aged 10-15 never buy that child’s games. The same is true for 1 in 10 parents of children aged 6-9.
   - 2 in 5 parents of children aged 10-15 describe themselves as ‘not at all’ or ‘not very’ knowledgeable about the games that child plays.
   - 4 in 10 children aged 6-9 and half of children aged 10-15 are sometimes/often playing games with an age rating higher than their age.

5. **46% of the online population recognise PEGI age rating symbols**
   - Three quarters agree that PEGI ratings should be applied to app games and games on social network sites, as well as packaged games.
   - 35% believe that the age rating system for games should be stricter than movies.
WHO PLAYS VIDEOGAMES? (ALL ONLINE RESPONDENTS)

41%

of the online population aged 16 to 64 years old in Italy have played a game in the past 12 months

Incidence of gaming amongst the online population in Italy is at 41%.

The largest gamer group is MALES AGED 35-44, although the profile of gamers is fairly evenly distributed across age and gender.
FREQUENCY OF GAMING (ALL ONLINE RESPONDENTS)

- Weekly: 25%
- Monthly: 7%
- Less frequently: 9%
- Never: 59%

TOP 5 REASONS FOR NOT GAMING

1. Not interested in them - 62%
2. More interested in other hobbies - 34%
3. No time to play them - 21%
4. Too old to play them - 15%
5. Don’t have a console at home - 11%

TYPES OF GAMES PLAYED (ALL ONLINE RESPONDENTS)

- ANY Video Gaming - 41%
- ANY Packaged - 18%
- ANY Apps - 20%
- ANY Online - 34%
- Downloads - 19%
- Social - 19%
- Websites - 17%
- Multiplayer Online - 9%

1 in 4 adults are playing games on a weekly basis. For non-gamers, a lack of interest in the category is the main barrier. ONLINE is the most popular form of gaming amongst the online population in Italy.

Across nearly all categories gamers are most commonly **MALES AGED 16-34**, with the dominance most pronounced in Packaged games (40% vs. 18% Total).

**FEMALES AGED 16-34** are more active in all forms of gaming than males 35-64.

The incidence of **SOCIAL** gaming is slightly higher amongst females in the 16-34 age group (33% vs. 31% males).
GAMES PLAYED: FREE OR PAID FOR (ALL ONLINE RESPONDENTS)

% of the online population playing each type of game

- **Apps**
  - Free: 19%
  - Paid for: 6%

- **Multiplayer online**
  - Free: 6%
  - Paid for game: 3%
  - Paid to play online: 3%

- **Downloads**
  - Free: 17%
  - Paid for: 7%

TYPES OF VIDEOGAMES PURCHASED IN THE LAST 12 MONTHS (ALL ONLINE RESPONDENTS)

- 28% Have bought a game
  - 17% New games on disc or cartridge
  - 9% Secondhand games on disc or cartridge
  - 6% Games apps
  - 4% Online games (download/subscription/extras)

Around a quarter of those playing APP games have played a game that was paid for. For DOWNLOADS, the number is closer to 1 in 3. 28% of the online population have bought a game in the last 12 months.
**DEVICES USED TO PLAY GAMES (ALL ONLINE RESPONDENTS)**

- **NET Console:** 24%
- **NET Portable games device:** 15%
- **NET Computer:** 34%
- **NET Mobile device:** 25%

**MOST USED (ALL GAMERS)**

- **PC:** 20%
- **Laptop:** 20%
- **PS3:** 9%
- **Wii:** 9%
- **iPhone:** 7%

**MOST USED (AMONGST PARENTS WHO PLAY GAMES WITH THEIR CHILDREN)**

- **PC:** 17%
- **Laptop:** 16%
- **Wii:** 14%
- **Nintendo DS:** 7%
- **iPhone:** 7%

**COMPUTERS** (laptops and PCs) are the most commonly used devices for gaming. 23% have used a *SMARTPHONE* to play a game in the past 12 months, more than any of the individual gaming devices. Computers are also the most used device amongst those gaming, although the **Wii** is relatively popular amongst parents who play games with their children.
82% of gamers play games online

WHEN PLAYING CONNECTED TO THE INTERNET, WHO DO YOU PLAY WITH? (ALL GAMERS)

---

Most commonly selected category for each word.
WORDS ASSOCIATED WITH GAMING:  
DIFFERENCE BETWEEN GAMERS AND NON-GAMERS

A fifth of gamers describe gaming as a **FAMILY ORIENTATED** activity, an aspect that is rarely acknowledged by non-gamers. Only 18% of non-gamers consider gaming to be a **FUN** activity.
GAMING AND THE FAMILY
61% of parents have children who play games

REASONS PARENTS PLAY GAMES WITH THEIR CHILDREN

- **They ask me to:** 32%
- **It's a fun activity for all the family:** 29%
- **To spend time with them:** 28%
- **I enjoy playing with them:** 26%
- **To monitor what games they play:** 17%
- **Educational benefits:** 14%
- **To monitor how long they play for:** 13%
- **Health and fitness benefits:** 12%

6 in 10 parents have children that play games. The majority of these play with their children (39% parents play games with their children vs. 22% don't).

The most common reason parents play games with children is because **they are asked to.** Health/fitness and educational benefits are acknowledged by a 12-14% of parents playing games with their children.
**WORDS ASSOCIATED WITH GAMING:**

**DIFFERENCE BETWEEN PARENTS OF CHILDREN WHO PLAY GAMES AND NON-PARENTS**

Parents of children who play games are more likely to describe gaming as **fun** and **competitive** than non-parents. They are also nearly three times as likely to describe gaming as a **family orientated** activity.
